PROFILE

About Us

RGMS is Bihar based Company dedicated to provide advances information technology GPS Tracking system for Fleet Management, Vehicle Tracking, School Management, Bike Tracking and Personal Tracking, Biometric Attendance System etc.

We are providing full visibility of all vehicles on single screens, which will help client to utilize the resources in efficient and cost effective way. It will also help in preventing the unwanted movement and late delivery/dispatch of critical supplies, Safety from theft and many more benefits for CLIENT.

Overview

RGMS which provides location-based solutions and services that track or monitor moving objects such as trucks, luxury bus, containers, ambulances, Car, Bike, Employee Tracking etc by GPS and GPRS. RGMS is an integrated hardware/software wireless solution designed to track and monitor mobile clients such as security vehicles, commercial trucks and field service vehicles. GT enables for on-line / off-line tracking of vehicles and store, represent, display data of moving objects which is then transmitted to the vehicle tracking server via wireless networks.

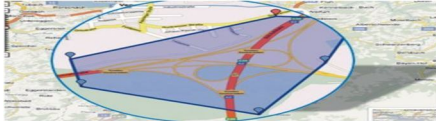

Vision

Our vision is to be a global innovator in deploying GPS Tracking and Mobile Workforce Solutions that result in Significant Customer Return on Investment. We are passionate in helping our customers achieve the benefits from our solutions. At RGMS, we treat our customers as our partners. We understand that we can only be successful when our customers fully achieve the benefits from RGMS solutions.

Vehicle Tracking System & Benefits:

RGMS Vehicle Tracking System helps not only in tracking and identifying vehicles along with its owners and users, but also monitors its movement and pops with alerts and alarms accordingly.

Geo-fencing (Safety)

When Geo-fencing is on, as your vehicle crosses any boundary of defined area you can get an alert. At that moment you can see the current location of vehicle.

Live Tracking

GPS based vehicle tracking system for tracking your vehicle location anywhere and at anytime. Our live vehicle tracking system uses GPS satellites to locate your vehicles & mobile technology to ensure that their positions, routes and logs are constantly updated.

Panic Button

Press this button to get help in an emergency. Single press will send SMS or holding it for 3 seconds will make a call to predefined number/s.

Audio Surveillance

Listen to the live audio or conversation happening near to device. Get exact location coordinates of the device based on GPS It also helps in anti-theft, as it calls your number in case of voice detection in your absence.

Theft Protection

Our system also sends out instant alerts and helps you track the current location of the vehicle. Motion detection and stolen vehicle alerts via the mobile application.

Mobile Vehicle App

Get an easy access to our VTS server through specially designed application. We are providing you easy and smart application which will take you into your VTS account and so you can track your vehicle with the help of your mobile as well.

Freedom is lost now...!
